

# Dmytro Nikolaev

Frontend Developer

## Profile

Passionate **Frontend Developer** with 5+ years of commercial experience, specializing in building scalable, high-performance **Angular** applications. Skilled in developing modular architectures, **Firebase** integrations, and implementing **Server-Side Rendering (SSR)** for SEO and speed optimization. Proficient in **RxJS** and **NgRx** for state management, reusable UI component libraries, and advanced Angular animations. Experienced in delivering pixel-perfect, responsive interfaces from **Figma**, ensuring cross-browser compatibility, accessibility compliance, and seamless **API integrations**. Strong command of **HTML5**, **SCSS/SASS**, and **modern CSS animations**, with a proven track record of optimizing performance through minification, image optimization, lazy loading, and frontend best practices.

## Employment History

### Frontend Developer at ALTVPN, Remote

Feb 2023 — Feb 2024

delivered services:

- Developed and maintained a responsive, component-based user interface using **Angular**, **TypeScript**, and **RxJS**.
- Implemented reusable UI components, form validation, and state management to ensure scalability and maintainability.
- Integrated **RESTful APIs** and optimized data handling with **Observables** for improved performance and responsiveness.
- Applied **SCSS**, custom designed components, and responsive design principles for cross-device compatibility.
- Managing **API** tasks for backend developers.
- Collaborating with HTML-developer.
- Configured and integrated **Firebase** Authentication (Email/Password, OAuth providers), protecting sensitive routes and features.
- Implemented **Server-Side Rendering (SSR)** with **Angular Universal** to improve SEO, first-contentful paint speed, and overall performance.
- Integrated **Transloco** for dynamic internationalization (i18n), enabling multilingual UI with **lazy-loaded** translations and language switcher.
- Created smooth, responsive **Angular animations** to enhance user experience and guide UI interactions.

## Frontend Developer at Computools, Remote

August 2021 — July 2022

delivered services:

- Refactored legacy codebase and upgraded application from **Angular 7** to **Angular 12**.
- Removed obsolete code and deprecated libraries (**jQuery**, etc.) to improve maintainability.
- Migrated all application modules to **Lazy Loading** for optimized performance and reduced initial load time.
- Designed and developed a **SPA** using **TMDB Open API**, implementing **NGXS** as a **Redux**-style state management solution.
- Integrated **Nest.js** backend with **MongoDB** for user authentication (SignUp/SignIn) and secure data storage.
- Implemented dynamic theme switching (light/dark mode) and multilingual support via official API.
- Developed initial structure for a Fitness **SPA** with a custom interactive calendar featuring horizontal and vertical scroll.
- Created responsive, accessible UI with modern Angular best practices and reusable components.

## Frontend Developer at ArgoPrep, Kamianske

June 2018 — February 2021

delivered services:

- Developed a modern **Angular**-based online learning platform for preschool and school-age audiences preparing for international exams (SHSAT, GRE, etc.).
- Built unique UI components and 15 fully responsive pages based on **Figma** designs, basing on **Angular Material** components with **Angular Flex Layout** for responsive, accessible design.
- Designed and implemented complete application architecture from scratch.
- Integrated with an existing backend **API** (95% ready at project start) using **Angular** and **TypeScript**.
- Implemented state management with **NGRX** for predictable data handling and scalability.
- Styled the application with **SCSS** and **CSS Flexbox** for consistent cross-device presentation.

## Web Master at Self-employment, Kamianske

January 2017 — December 2017

Created 9 landing pages for real clients in my city.

Used Tech & Tools:

CSS, SCSS, HTML5, JavaScript, jQuery, AJAX, Bower, Bootstrap, Animate.css, Yandex Metrika, Greensock.js, ScrollMagic.js, Google Analytics, Google Maps, PHP, MySQL, nginx, WAMP

## Education

### School Diploma, School, Kamianske

September 1995 — May 2006
